tilo

The image shows a minimalist living room with light-colored wood flooring. On the left, a dark grey sofa is partially visible. In the center, two dark, round coffee tables sit on a light grey rug. The right side of the room is dominated by a wall of floor-to-ceiling glass windows. Through the windows, a wooden terrace with a lounge chair is visible, overlooking a cityscape and a lush green landscape with trees. The sky is bright and clear.

tilo

**Disrupt the
ordinary.**

PROGRESS BEGINS WHEN WE STOP ACCEPTING THINGS AS THEY ARE. WHEN QUESTIONS ARE MORE IMPORTANT THAN ANSWERS. WHEN CURIOSITY PIQUES AND THE DESIRE TO CREATE SOMETHING NEW CAN NO LONGER BE SATIED. FRESH THINKING DOESN'T EMERGE FROM A LABORATORY, BUT INSTEAD FROM WHERE WE LIVE.

A scenic landscape featuring a range of rugged, snow-dusted mountains under a pale, overcast sky. The mountains are reflected in a calm, glassy lake in the foreground. The overall color palette is muted, with various shades of blue, teal, and grey. Overlaid on the center of the image is the text "The perfect reproduction." in a large, white, sans-serif font.

The
perfect
reproduction.

ROBUST, SOFT, WARM

Where nature meets its limits.

The world of vinyl begins where Mother Nature has done all she can. A floor that is almost indistinguishable from the original and yet is capable of so much more. As well as being pleasantly soft and warm underfoot, vinyl is also extremely durable and very easy

to maintain - with no oiling, sanding or any other laborious care needed. Its hard-wearing properties protect against scratches and impacts, while the integrated cork layer absorbs the noise of every step. A floor made for the demands of everyday use.

CREATE SPACE

**Two metres
twenty.**

Single planks of 2.20 metres length or more epitomise spaciousness. Yet for a long time it was not possible to produce vinyl boards longer than 1.2 metres. tilo was not prepared to accept such a limitation. By building our own production equipment, we are able to produce vinyl planks in unique parquet lengths every time. But how? The original parquet planks in their initial dimension of 2.20 metres are scanned and used as a basis for the vinyl design to produce single vinyl planks - a size with real impact.

2.20 m

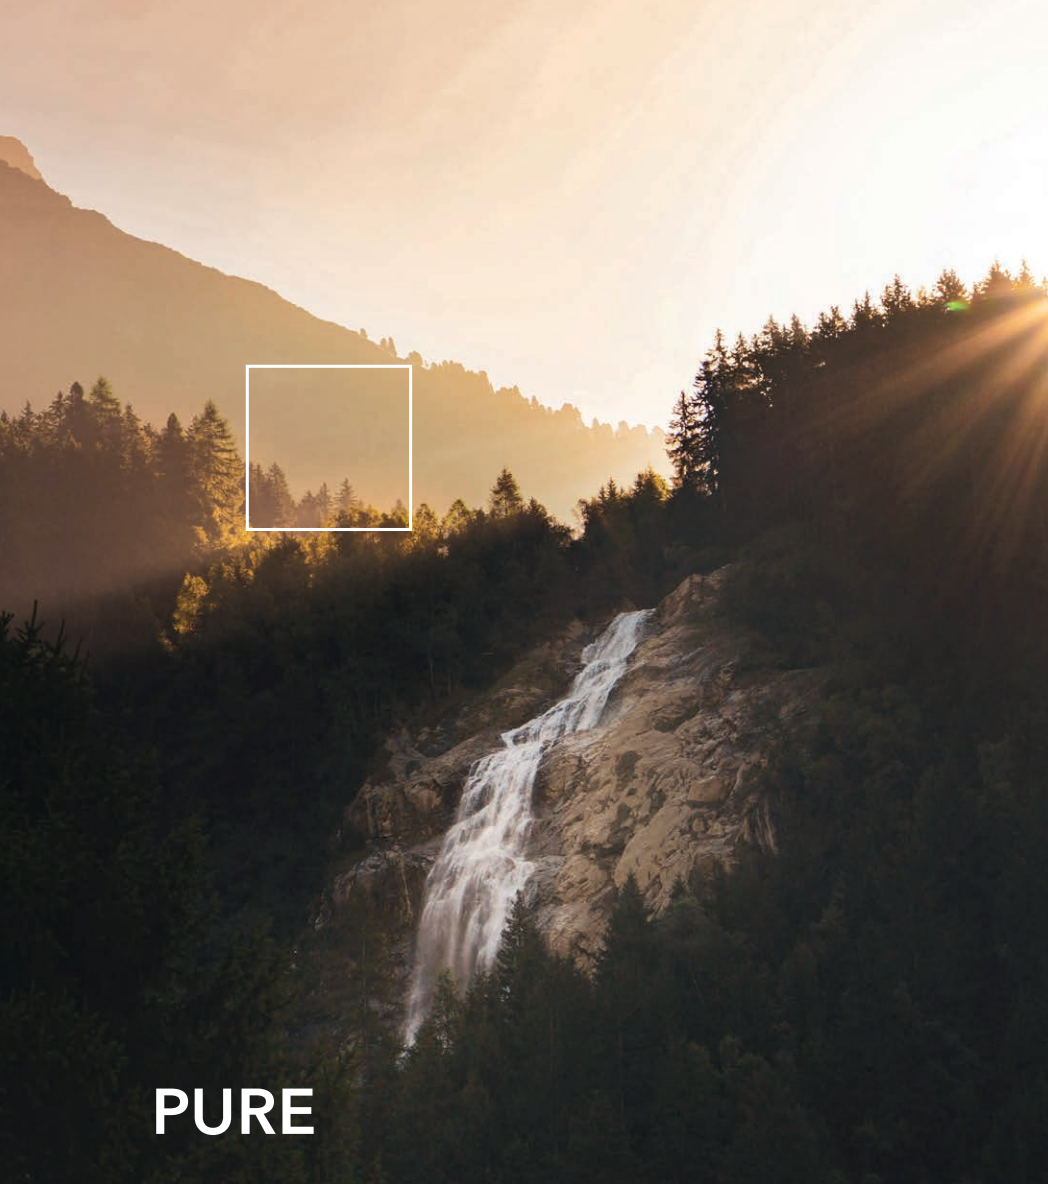

COLORS OF EARTH

Reproducing parquet authentically.

The CoreColor Concept from tilo brings the colours of parquet to a hard-wearing floor. A deliberate use of colours creates varying effects: PURE harks back to an original feel and adds a special level of depth; INTENSE brings character, warmth and comfort, while PASTEL exudes a refined, spacious feel. Vinyl also offers better colour stability than natural floors, with vinyl designs being particularly long-lasting.

SOFT-SYNCHRON SURFACE STRUCTURE

**Not just visible,
but tangible.**

SOFTSYNCHRON

How do you bring the emotion invoked by wood to an engineered material? Through the next level of vinyl embossing - the soft-synchron surface structure - where embossing and decoration are perfectly balanced. Knotholes, cracks and pores are not just visible, but tangible. The result is an incomparable appearance and a feel that's equal to real wood in every way.

CALM

VIBRANT

GRADED EFFECT

The language of wood.

It has always made sense to grade parquet planks by characteristics like knots, cracks, grains and hues. These features give the floor its unique character - calm, vibrant or rustic. Introducing wood gradings to the world of vinyl will transfer the key quality characteristics of parquet flooring to modern design floors: a step that sets new standards in terms of aesthetics and customisation.

BATHROOMS, HALLWAYS, GYMS & SPAS ...

Water-resistant flooring.

24h PROTECTION
AGAINST MOISTURE
WITH TILO VINYL FLOORS.
TESTED TO INTERNATIONAL
ISO 4760 STANDARD
(NALFA TEST).

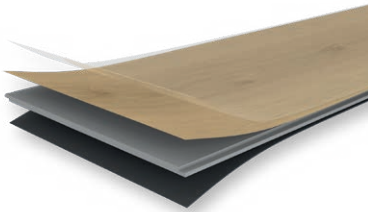

tilo's HDF Vinyl and SPC Vinyl are smart solutions for damp conditions as verified by the NALFA test. Provided the floor is properly adhered, no drips penetrate through the locking system and no moisture enters the subfloor. Water resistant for at least 24 hours, it is ideal for bathrooms, hallways or gyms and spa areas.

LIKE A CHAMELEON CHANGES ITS COLOUR TO MATCH ITS SURROUNDINGS, AT TILO WE MATCH OUR VINYL FLOORS TO THE NEEDS OF OUR CUSTOMERS.

HDF VINYL

tilo HDF Vinyl means the maximum in comfortable living thanks to an especially authentic softness underfoot, coupled with the minimum quantity of vinyl and high-quality aesthetics.

SPC VINYL

As stunning as parquet plus 100% waterproof. tilo SPC Vinyl is revolutionising the world of flooring. It is an incredibly robust and easy to maintain all-purpose floor with the popular look and pleasant feel of parquet.

DRYBACK VINYL

Only 2.5 mm thick yet extremely rugged, 100% waterproof and suitable for a variety of applications. For creative laying patterns in commercial settings. Design for connection.

AS ADAPTABLE AS A CHAMELEON

**One decor,
countless possibilities.**

A modern gym interior featuring a series of concrete pillars with integrated lighting, a light wood floor, and exercise equipment like treadmills and stationary bikes. The space is bright and airy, with large windows on the left side showing a view of trees.

One world.
Two perspectives.

tilo

From opposites comes impetus. From two perspectives comes one solution. We combine the status quo with progress, nature with technology and wood with plastic to create ground-breaking innovation. Standing still is not an option.

Technology

connects.

We bring the beauty of nature to vinyl - with soft-synchron structures and colours that breathe life into spaces and dimensions that create expansiveness. And we bring the functionality of vinyl to parquet - with stable connections, easy-to-maintain materials and innovative technologies like oiled surfaces and integrated varnished finishes. Two seemingly opposing worlds that we at tilo bring together in perfect harmony.
